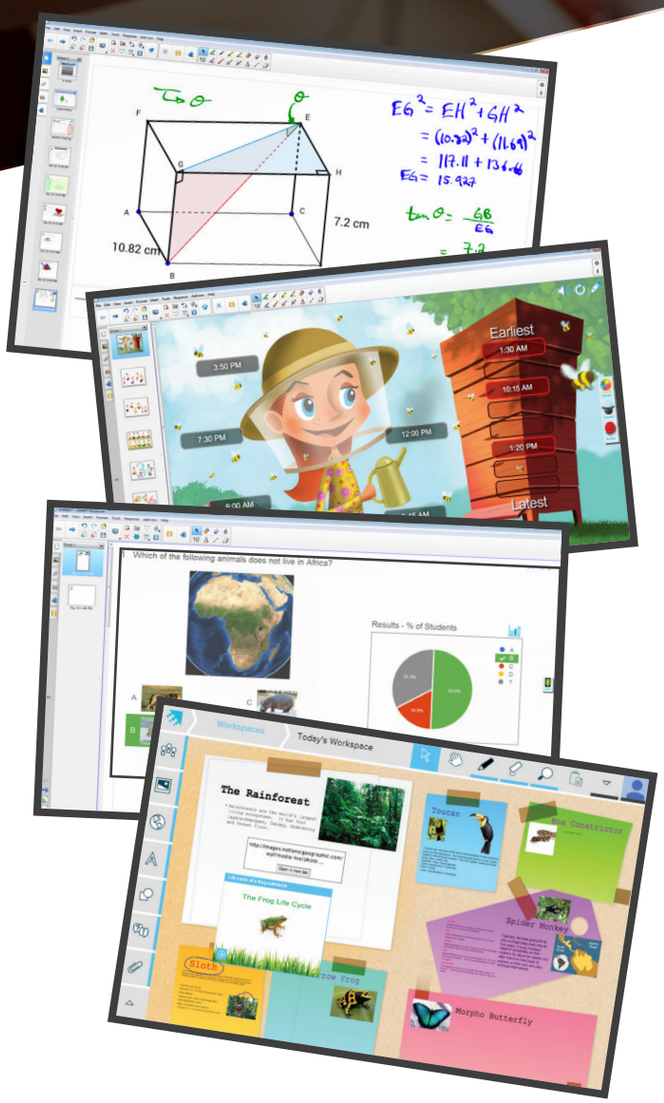
SMART Learning Suite

Any device. Any approach. Learning is all around us.

SMART Learning Suite combines 4 software applications, each uniquely designed for the classroom. It's one ultimate education suite with one simple pricing model.



SMART Notebook

Notebook is the ultimate education platform for lesson creation and delivery. It includes subject-specific tools, lets you run a lesson from your iPad and has thousands of free resources to engage students and make lesson planning easy.

SMART lab

SMART lab gives teachers the means to quickly build game-based activities that amaze and engage students. Students are too busy having a great time to realize how much they are learning!

SMART response 2

What better way to ensure student success than to instantly see how well they've understood a lesson? This formative assessment software allows you to create a question set in a few minutes that students can answer from their devices.

SMART amp

Bring the whole class, groups of students or individuals together in a shared space to work on projects, add multimedia content and instant message. This is all done using student devices and while tracking contributions from each student.
