

Developing Maths in the Early Years Work Group

with Helen Adams

Apply **HERE** by
18 December 2020

A Work Group specifically aimed at supporting schools with nursery classes

This Work Group will focus on helping early years teachers in understanding their role in the teaching of mathematics, whilst developing an understanding of progression in mathematical learning and thinking. The intention is that the nursery teacher and reception teacher will be part of this Work Group together, where this is not possible then participants from partner schools can apply together as long as there is a commitment to collaborative working. Your senior leader will be engaged in the first and last session to support whole school impact.

Who is this Work Group for?

- Pairs of nursery and reception teachers within your setting or partner schools
- This Work Group would be ideally suited for newly and recently qualified teachers

HELEN ADAMS is the Headteacher of Truro Nursery School and a National Leader of Education for the Cornwall Early Years Teaching School.

To find out more, join Helen for an online meeting on 8 December 2020
