

# Pirate Education & Training

Pirate Education and Training is the educational arm of Pirate FM. Our prime focus is to provide media based workshops and support for Schools, Colleges, HE and the local community via charities and groups.

Our Education and Training lead has worked as a teacher and course manager of Media Production in FE for the past 8 years and also has experience in Art, Theatre, Games and Audio. This includes a knowledge of VLE's, Adobe Creative Cloud and working with PC, Mac and Android.

For more information on what we offer please see the following pages. If you would like to work with us or request a quote please get in touch:

# SCHOOLS

## Primary

We offer media workshops that fit around your needs. If you have a project you are currently working on, we can create bespoke workshops that help with learner engagement. We provide workshops that cover a range of learning styles and promote creativity and communicating ideas.

Consider a History video, or doing graphic design posters for Geography. Perhaps a podcast for English or a blog for a science project.

We can also work with local charities to create and facilitate larger projects with real outcomes. We can also help with introducing more digital resources into your classroom and provide teacher training and support with creating new teaching materials.

If you are interested in expanding your schools facilities we also provide support and pricing for the set-up of a school radio station as well as training for students and staff.

## Secondary

As well as media workshops related to lesson content we can provide workshops that help promote life-skills and create projects that can offer client interaction that help reflect real work environments.

We can also provide support with careers/FE advice to enable learners an opportunity to identify the best next step. For staff, we can carry out training in the use of media within the classroom as well as software that can be used to enhance learning.

# COLLEGES

## For Students

Pirate Education & Training can work with you to create lessons that help embed a media element such as:

- Video Creation
- Graphic Design
- Photography
- Radio/audio production

We also offer careers advice and can run CV building and communication workshops that help prepare students for employment.

At Pirate FM we work with a range of clients and can facilitate in creating connections that benefit your students in order to plan lessons that are reflective of 'real-world' expectations. This can include working with charities on social media campaigns relevant to your course content.

## For Staff

We are also able to run training which can cover a range of topics, including but not limited to;

- Using technology within the classroom
- Structuring courses to be industry relevant
- Building an identity

We can build training to suit the needs of employees, just ask and we'll do our best to work on training that is beneficial for all staff.

# COMMUNITY

Pirate FM has a longstanding place within the Cornish community and has built up excellent relationship with businesses and charities. Through Pirate Education and Training we can offer a variety of opportunities.

- Community Media Workshops
- Engagement/support for projects & charity work
- Training for Businesses and groups

We have worked alongside Headstart Kernow, Safer Stronger Cornwall, Pluss, DWP, Clean Cornwall CAPH, Action for Blind and others and are always happy to discuss potential collaborations and training.

Some of our popular workshops are:

- E Safety
- World of Work (Yr 9/10 focus for options/careers and work experience)
- Environment (With real-world application)
- Transition Workshops (For Year 6's to prepare for secondary school)

If you have a particular project in mind and are interested in expanding it, please get in touch and see how we can help you.
