

Save Money and Energy!

When considering how to reduce our impact on the environment less is usually more. The green charter adopted by most schools across Cornwall sets out the aim to **reduce energy by 10 %**.

We are launching a competition to see which schools /youth organisations can make the biggest difference in their energy usage over a two week period.

4 Simple Steps to Save Energy:

1. Take a baseline reading. Your site manager should have access to this data, if not contact the energy provider.
2. Arm you Eco- team with the powers to go into classrooms and identify where lights, PC, projectors are being left on or on standby when not in use.
3. It is a good idea to provide training and information to school staff – this often most powerful with student input. Remember to keep everyone informed of your progress!
4. Take your final readings after two weeks

CloS Switch off Fortnight | 13th to 24th April 2020

1st Prize – 1

Win a Eco-workshop for your school

2nd prize – 2

Win a full environment audit for your school and tailored action plan x 2

3rd Prize - 4

wildlife habitat home x 4

Are you are part of the Eco-schools program?

An energy saving campaign like this contributes to your silver accreditation.
